TRADEMARK APPLICATIONS DAILY
XML DTD ELEMENT DOCUMENTATION (V2.3)

XML Elements	Description
<trademark-applications-daily>	The <trademark-applications-daily> element is mandatory and will occur one time identifying the beginning of a daily application process. The trademark applications daily element will contain one occurrence of the version and data processed indicator elements, and zero or more occurrences of the file segments element between the <trademark-applications-daily> start and </trademark-applications-daily> end tags.
<version>	The <version> element is mandatory and will occur one time between the <version> start and </version> end tags identifying the version number and version date of the Trademark Applications DTD. The version element will contain one occurrence of the version number and version date elements.
<version-no>	The <version-no> element is mandatory and will occur one time between the <version-no> start and </version-no> end tags containing the version number of the Trademark Applications DTD. Example: the first production version will be 1.0
</version-no>	
<version-date>	The <version-date> element is mandatory and will occur one time between the <version-date> start and </version-date> end tags containing the date of the Trademark Applications DTD, an 8-position numeric in the format YYYYMMDD.
</version-date>	
</version>	

APPLICATION INFORMATION SECTION	
XML Elements	**Description**
<application-information>	The <application-information> element is optional and will occur zero or one times between the <application-information> start and </application-information> end tags containing the daily trademark applications data.
<data-available-code>	The <data-available-code> element is optional and will occur zero or one times when trademark data is <u>NOT</u> present. The <data-available-code> start tag and the </data-available-code> end tag will be present and contain a one-position "N" indicating that trademark data is <u>Not</u> present. This element will not be present when data is available.
</data-available-code>	
<file-segments>	The <file-segments> element is optional and will occur zero or more times between the <file-segments> start and </file-segments> end tags identifying the beginning of the Trademark Applications file. The <file-segments> element will contain zero or more occurrences of the file segment and action keys elements.
<file-segment>	The <file-segment> element is optional and will occur zero or more times between the <file-segment> start and </file-segment> end tags containing the File Segment text data, a four-position alphabetic field identifying the type of data in the Trademark Daily XML Process. The Trademark Applications <file-segment> will always have a constant of "TRMK". The "TRMK" file segment contains new trademark data and modifications made to existing Trademark data.

<action-keys>	The <action-keys> element is optional and will occur zero or more times between the <action-keys> start and </action-keys> end tags. The action keys element will contain zero or more occurrences of the action key and case file elements.
<action-key>	The <action-key> element is optional and will occur zero or more times between the <action-key> start and </action-key> end tags containing the KEY ACTION, a two-position alphanumeric field. The contents of the action key will be one of the following values for marks appearing in the Trademark *Official Gazette* (OG). Position 1st 2nd Category 0 0 Published for Opposition 1 0 Principal Register 1 5 Principal Register - Published Intent to Use 2 0 Supplemental Register 3 0 Section 12(c) 4 1 1st Renewal 4 2 2nd Renewal 4 3 3rd Renewal 4 4 4th Renewal 4 5 5th Renewal 4 6 6th Renewal 5 1 Cancelled Sec. 7(e) - Entire Registration 5 2 Cancelled Sec. 7(e) - Less than Total Classes 5 3 Cancelled Sec. 8 - Entire Registration 5 4 Cancelled Sec. 8 - Less than Total Classes 6 1 Cancelled Sec. 37 - Entire Registration 6 2 Cancelled Sec. 37 - Less than Total Classes 6 3 Cancelled Sec. 18 - Entire Registration 6 4 Cancelled Sec. 18 - Less than Total Classes 6 5 Cancelled Sec. 24 - Entire Registration 6 6 Cancelled Sec. 24 - Less than Total Classes 6 7 Inadvertently Issued Registration Number 7 0 Amended 7 1 Restricted 8 0 Corrected 9 0 New Certificate I B "IB" for Marks that are used as a basis for filing a Madrid International Request N A "NA" for New Applications filed (an "NA" Action Key will not appear in the OG) T X "TX" for Marks that have been modified (a "TX" Action Key will not appear in the OG)

<action-key> cont'd.	The value of the <action-key> field and the serial number for "00", "IB" "NA" and "TX" key actions values (or registration number for all other key actions) will determine the sequence of the file based on the following order of precedence:
	    1st – Marks appearing in the OG
	    2nd – Marks requesting International Registration in a country other than the USA
	    3rd – New applications filed
	    4th – Marks that have been modified

Empty Element Information	**NOTE**: Elements throughout the Trademark Applications DTD that have no data content will contain an empty element tag. For example: <foreign-applications/>.
XML Elements	**Description**
<case-file>	The <case-file> element is optional and will occur zero or more times between the <case-file> start and </case-file> end tags containing the following elements in the sequence as follows:

\<serial-number\>	The \<serial-number\> element is mandatory and will occur one time between the \<serial-number\> start and \</serial-number\> end tags containing the SERIAL NUMBER, an eight-position numeric field consisting of the following: \<Serial number\>: Position 1-2 will contain a series code: SERIES CODE FILING DATE 70 indicates filing dates ranging from 1870-10-25 through 1905-03-31 71 indicates filing dates ranging from 1905-04-01 through 1955-12-31 72 indicates filing dates ranging from 1956-01-01 through 1973-08-31 73 indicates filing dates ranging from 1973-09-01 through 1989-11-15 74 indicates filing dates ranging from 1989-11-16 through 1995-09-30 75 indicates filing dates ranging from 1995-10-01 through 2000-03-20 76 indicates paper filings from 2000-03-20 to present 77 indicates Internet filings from 2006-09-14 to 2010-03-26 78 indicates Internet filings from 2000-03-20 to 2006-09-14 79 indicates §66(a) filings from 2003-11-03 to present 80 - 84 Serial numbers starting with 80 - 84 are pseudo serial numbers and are created for registration records where the serial number is unknown. Pseudo serial numbers are created by prefixing an "8" before the seven-digit registration number. If the registration number is less than seven digits in length, it is padded by leading zeros before prefixing the "8". 85 indicates Internet filings from 2010-03-27 to 2013-07-01 86 indicates Internet filings from 2013-07-01 to 2016-04-13 87 indicates Internet filings from 2016-04-13 to 2018-06-14 88 indicates Internet filings from 2018-06-14 to 2020-06-13 89 assigned to filings covered under Article 6 and other Acts of Congress. 90 indicates Internet filings from 2020-06-13 to 2021-08-28 97 indicates Internet filings from 2021-08-28 to 2023-05-17 98 indicates Internet filings from 2023-05-17 to present Position 3-8 will be a six-position serial number right justified with leading zeros. NOTE: When the \<serial-number\> begins with 80, 81 or 82, the actual serial number is unknown and the serial number is created by placing an "8" before the seven-digit registration number. If the registration number is less than seven digits in length, it is preceded by zeros. When the \<serial-number\> begins with 89, non-registration data consists of information entered in the data base because of treaty obligations, U.S. Statutes, or other requirements. ***NOTE: The Series Code 60 was recently created for old "DEAD" registrations where the Serial Number is unknown, but the Registration Number exist in USPTO search systems.***
